# FREE EVALUATION: Luxury coffee made at home

★★★★★ 1 Vote

Being a coffee lover, it's a great feeling to have my coffee made something like from a coffee shop or cafe at home. Nothing could be more better than this. I have 2 kinds of coffee wherein I use a capsule machine and the cooking style for chai (tea) for the other one to brew coffee. Now this newly introduced to me is absolutely the most brilliant one! I couldn't believe that there's an Italian brand called **Caffe di Artisan** that could make your cup of coffee at home in 60 secs without any machine with their coffee pods (capsules). So I tried them to unlock the curiosity in me.

The package came with a box with a free **Frother**. This frother is the one which will make the foamy state of the coffee and milk. It releases the aroma of the coffee too on the process. There are 4 kinds of coffee inside the box such as **Organique**, **Asmara**, **Raro** and **Vilasita**. Among these, my favourites are Raro and Vilasita. There's an instruction included which is very easy to follow. Watch my video below:

Now if you've noticed, it's just a coffee and milk together and some added sugar. No water. Did you know that this product's life can be extended by storing the capsules in the freezer? Yes! Normally, on a room temperature or even at the lowest level of the fridge it can last for 30 days. But once you froze them, it can take over a year. Awesome right? Just defrost 2-3 hrs before using or put it straight in the microwave to liquify again.

It's so magical! Caffe di Artisan has been brought to UAE to experience a luxury coffee. What's more? It's made to order product. It's a fresh coffee for us. Once they received the order that's the time they will start roasting, grinding and filtering.

Go ahead and check their [website](#) and read more about them. You can order from there or whatsapp 055 879 8113.
